

New to enterBooks.com – Personal List

Building on ideas from our library customers Dawson has enhanced our enterProfile service with the addition of a Personal List feature.

Titles can be saved to a personal list with an optional comment and recalled at any time. These titles can be selected from monthly selection lists or as a result of a normal search.

Your personal list can be displayed in several sequences, and maintained by changing the comment or removing from your Personal List.

The contents of your Personal List can be downloaded to an Excel spreadsheet in the same way as your monthly lists and search results.
