

## **Dawson promotes the use of EDI**

**11<sup>th</sup> September 2003**

At a time when uncertainty exists about the reliability of postal written orders, Dawson has pioneered the use of EDI (Electronic Data Interchange) information transfer, using the extraordinary power of a data technology that is at the heart of the Dawson Total Book Management service.

Continued development harnesses EDI to power our fully automated supply chain, linking Dawson Books with our customers and suppliers in over 4 million transactions per year for:

Just some of the uses of EDI.

- Order Processing
- Order Status reporting
- Dues management
- Stock availability
- Invoicing

Is your library using EDI?

For further advice or to discuss the benefits that EDI can bring to a library and the Total Book Management concept, call George Hammond - +44(0)1933 417500
