

More Springer titles on dawsonera!

◆ Springer Verlag

Springer aims to offer excellence and more than 150 Nobel prize-winners have published with Springer to the present date. Many of their publications are considered authoritative works in their field, read by academics and students, used by libraries and universities, academic professionals and practitioners in various branches of industry.

500 Springer titles, including those in French and German, have been added to dawsonera recently.

These are a sample:

- ▷ **"Computational aspects of general equilibrium theory : refutable theories of value "**
Donald Brown, Felix Kubler.

This monograph presents a general equilibrium methodology for microeconomic policy analysis intended to serve as an alternative to the now classical, axiomatic general equilibrium theory as expounded in Debreus Theory of Value(1959) or Arrow and Hahns General Competitive Analysis(1971).

- ▷ **"Handbook on decision support systems"**
Frada Burstein, Clyde W. Holsapple (Editors). 1, Basic Themes.

The aim of this book is to survey the decision support system (DSS) field – covering both developed territory and emergent frontiers. It will give the reader a clear understanding of fundamental DSS concepts, methods, technologies, trends and issues.

- ▷ **"Human missions to Mars : enabling technologies for exploring the red planet "**
Donald Rapp.

In Human Missions to Mars Donald Rapp looks at human missions to Mars from an engineering perspective. He begins by describing the pros and cons of robotic exploration versus human exploration and then examines the ideas for sending humans to Mars from the point of view of both the enthusiast and the skeptic.

Including Springer, more than 15 publishers have added fresh content this week.
