

Computing Guidance and Governance Available as eBooks

This week Dawson would like to draw your attention to the recent addition of ebooks from the British Computer Society and IT Governance Publishing. Both promote wider social and economic progress through the advancement of information technology science and practice.

The British Computer Society is the leading professional body for the IT industry and a welcome addition to our catalogue of computer and information systems titles. The organisation serves over 70,000 members including practitioners, businesses, academics and students, in the UK and internationally. BCS is responsible for setting the standard for the IT profession and this is reflected in the publications it produces. It leads the change in public perception and appreciation of the economic and social importance of professionally managed IT projects and programmes.

Bestselling highlights include:

Business Analysis D.Paul & D.Yeates eISBN 9781906124304

Provides workable skills and techniques, underpinned with academic theory. This practical introductory guide is suitable for those involved with various aspects of business analysis or improving the effectiveness of IT and its alignment with the organisations' business objectives.

Electronic Business G.Sampson eISBN 9781906124359

Online retailing continues to grow at a staggering rate. IT professionals are playing an increasingly pivotal role in shaping this new business landscape, and the success of many business ventures is growing ever-more dependent on their skills and knowledge. This book provides a solid grounding to e-business and e-commerce. It is invaluable to anybody studying IT or Business Studies or taking an MBA.

BCS Glossary of Computing and IT, 12th Edition eISBN 9781906124298

A glossary of computing to support those taking computer courses or courses where computers are used, including GCSE, A-Level, ECDL and 14-19 Diplomas in Functional Skills, in schools and colleges. "Should be available in all schools and tertiary institutions teaching courses in computing and IT" (*Physics Education*)

IT Governance Publishing publishes books and toolkits that cover data security, compliance, risk management, IT service management, management systems, and business continuity. The initial success of the ITGP range was based on Alan Calder's popular and successful books on information security and IT governance. It is now focusing on broadening the range of authors that it publishes.

IT Governance shares the Dawson commitment to ebooks: "We wish to make our titles as easily available as possible for our customers who will appreciate the flexibility and cost-effectiveness of being able to access the resources they need, how and when they want them, explains CEO, Alan Calder. We're very supportive of the entire ebook industry and, as our readers tend to be amongst the more technologically aware, we're determinedly making our entire back list and all future publications available through as many electronic and new channels as possible."

For more information about dawsonera, or to request a specific publisher list, please contact: enquiries@dawsonera.com or telephone +44 (0)1933 417500 to speak to a member of the team.

Take advantage of our title matching facility. Either supply a wish list of titles, or ask Dawson to match against your printed acquisition history.
